

2/21/17

Care for kids plays a major role in my life. I am a single mother of three children who works two jobs which barely pays the bills. Without Care for Kids I would not be able to provide for my children how I do now. Care for Kids helps me tremendously when it comes to paying for my childcare. Let me tell you I don't know how anyone can afford to pay childcare; it is so expensive. I love the childcare center my children go to. It's not just a "babysitter," they help my children learn activities as if they were in an actual school. My three and one year old has made so much progress since going to my childcare center. It's more like a family center than anything. As a parent I can say when I am at work I have no worries about how my children are treated because when I come to pick them up they never want to leave. Imagine you as a parent and you have to leave a safe and secure Child care center because you cannot afford your childcare for your children. I wouldn't be able to work. I would have to try and find someone who isn't licensed to take care of my children. In the back of my mind I would think are they being treated well? What are they eating or are they even eating at all? A parent shouldn't have to go through that when they are at work. I thank god I have care for kids to help me out every day because without this program I don't know what my children and I would do.
